## PROFILE

---

AI & ML enthusiast with strong foundations in machine learning, deep learning, and natural language processing. Experienced in building end-to-end ML pipelines including data preprocessing, feature engineering, model training, evaluation, and deployment.

## EDUCATION

---

|                                                                                                                                                                 |                                       |

## PROFESSIONAL SKILLS

---

**Programming:** Python .  
**Python Libraries:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Keras .  
**Data Science Concepts:** Machine Learning, Deep Learning, NLP, Neural Networks, Feature Engineering, Model Evaluation, Data Preprocessing .  
**Tools:** Jupyter Notebook, Google Colab, VS Code .

## AI TOOL

---

- n8n- Designed automated workflows and integrated APIs for building scalable data pipelines.

## PROFESSIONAL PROJECTS

---

### Predictive Analytics for Mental Health: A Deep Learning Approach to Sentiment Classification

- Developed a Mental Health Sentiment Analysis system using Python, NLP, and Machine Learning to classify emotional states from text data.
- Utilized libraries such as Scikit-learn, NLTK, and Pandas for preprocessing, feature extraction, and model building.
- Implemented TF-IDF vectorization and trained models like Long-Short Term Memory (LSTM) and GRU.

### Automotive Market Intelligence: A Machine Learning Engine for Real-Time Asset Valuation of Car

- Developed a Car Price Prediction Model using Python with libraries like Pandas, NumPy, and Scikit-learn.
- Performed Exploratory Data Analysis (EDA) to identify trends, patterns, and feature relationships.
- Handled missing values and data preprocessing to improve data quality and model performance.
- Implemented and compared multiple models including Linear Regression, Decision Tree, Random Forest, and XGBoost.

## STRENGTHS

---

- Quick learner with strong interest in mobile development & security.
- Good understanding of Java fundamentals and Android frameworks.
- Strong problem-solving and teamwork abilities.

## CO-CURRICULAR ACTIVITIES

---

- Participated in college events as a video editor and photographer, creating highlight reels and event coverage.
- Captured and edited photographs for cultural, technical, and social events.
